

# Benjamin

## Professional Summary

Experienced **Frontend Developer** skilled in creating high-performance, user-centric web applications. Proven expertise in leading cross-functional teams, optimizing development workflows, and driving UX improvements across industries.

## Areas of Focus

**Leadership:** Guiding technical strategy and architectural decisions to meet client objectives, fostering collaboration across cross-functional teams.

**Technologies:** JavaScript (ES6+), TypeScript, React, Angular, Node.js, GraphQL, SQL, REST APIs

**Process & Design:** Agile methodologies, CI/CD, responsive design, UX optimization, accessibility standards

## Skills

**Frontend Frameworks:** React (Hooks, Context API, Redux), Angular (AngularJS), jQuery

**Languages & APIs:** JavaScript, TypeScript, HTML5, CSS3 (Sass, Less, CSS-in-JS), GraphQL, REST APIs

**UI/UX & Design Tools:** Figma, Adobe XD, Sketch, Confluence, Markdown

**Testing:** Jest, Enzyme, Jasmine, React Testing Library, Vitest, Mocha, Chai, Puppeteer, Selenium, Cypress, Playwright, Storybook

**Build & Deployment:** Webpack, Babel, Vite, Parcel, Gulp, Grunt, Docker, Kubernetes, AWS (S3, Lambda, EC2), Heroku, Netlify, Vercel, Git, GitLab, GitHub, Bitbucket, Jenkins, CircleCI, GitHub Actions, GitLab CI

## Professional Experience

### Consulting | Technical Consultant

5/2024 - Present

Advised clients on frontend technologies, UX strategies, and scalable development solutions. Delivered impactful recommendations to optimize technical architectures and reduce operational risks.

- **Barter Share Trade:** Enhanced user experience through a redefined frontend architecture, streamlining design workflows and establishing best practices for collaboration.
- **AI/ML-Based Platform:** Conducted feasibility analysis for AI integrations, enabling scalable and efficient content automation strategies for client platforms.
- **General Consulting:** Reviewed and vetted technical proposals, identifying optimal technology stacks to ensure sustainable and cost-effective solutions for various clients.

## Frontend Engineer | Various Clients

06/2022 - 04/2024

Delivered tailored frontend solutions using React, TypeScript, Angular, and modern web technologies. Focused on creating scalable, accessible, and user-friendly applications.

- **Blue Origin:** Designed and implemented custom React components, improving accessibility standards and fostering cross-team collaboration through shared component libraries.
- **Barter Share Trade:** Led the development of frontend architecture for web and mobile platforms, introducing streamlined workflows with comprehensive Figma style guides.
- **General Projects:** Evaluated contractors and technology stacks to reduce development costs by up to 50%, ensuring lean, efficient delivery of client solutions.

## Dun & Bradstreet / Lattice Engines | Senior UI Engineer

06/2016 - 05/2022

Led the development of the B2B enterprise React application. Spearheaded agile workflows, mentoring team members, and optimizing processes to enhance project outcomes.

- Directed the transition from Angular to React, improving maintainability and increasing code coverage by 60%.
- Developed scalable UI components for a company-wide design system, boosting application stability and team efficiency.
- Enhanced team productivity and morale by implementing Scrum practices as Scrum Master, streamlining backlogs and fostering collaboration.

## Raptr, Inc. | Senior Frontend Developer

05/2015 - 05/2016

Contributed to Plays.tv's interactive features and video streaming performance optimizations.

- Enhanced Plays.tv's Ajax-based applications, driving greater interactivity and responsiveness.
- Reduced video load times by 90% through DASH streaming optimization, improving playback speed and quality across devices.

## TheFind.com | Lead UI Engineer

09/2006 - 04/2015

Developed and maintained core UI features, contributing to a framework later adopted by Facebook.

- Pioneered UX design enhancements in collaboration with product teams.
- Spearheaded bug triaging and backlog management to maintain project quality and continuity.
